SUMMARY

Developer with solid hands-on experience in Front-End development (React) and applied knowledge of Next.js, Node.js, PostgreSQL, and SQL databases gained through a full-stack learning path and personal projects. I deliver end-to-end freelance projects for real clients — from landing pages to corporate websites with CMS integration and third-party services — managing the entire development lifecycle, including requirements gathering, development, API integration, deployment, and maintenance. Currently expanding my expertise in back-end development with Node.js, relational database design and management (PostgreSQL/SQL), and SSR/SSG applications using Next.js, while seeking opportunities to apply and further develop these skills in production environments. Graduated in Systems Analysis and Development from FMU (2025).

PROFESSIONAL EXPERIENCE

Freelance Front-End Developer — Client: Pedro & Naidhig Advogados -June 2026

- Developed a lead-generation landing page for a law firm specializing in vehicle repossession defense cases.
- Built the firm's corporate website, including content modeling and management using Sanity CMS.
- Structured the page with a focus on conversion (clear CTA, problem-oriented copy) and local SEO.

Front-End Developer (Freelance) — Client: BYTEJB - May 2026

- Developed a website for a 3D printing and laser cutting service business, including creating the logo, color palette, and visual identity in collaboration with the client.

Front-End Developer (Freelance) — Client: KB Photographer - January - March 2026

- Built an institutional website and bilingual (PT/EN) link hub from scratch.
- Integrated third-party APIs (HoneyBook, Pic-Time) to automate the scheduling and photo delivery workflow for clients.
- Responsible for on-page SEO strategy, including meta tag optimization, content structure and performance.

PORTFOLIO

Personal Portfolio — portfolio.gcstudio.dev

- Check out my portfolio to explore projects built with React, JavaScript, HTML, and CSS — web applications, landing pages, and responsive websites focused on usability, design, and performance. Site with bilingual (PT/EN) support, custom domain with HTTPS, and continuous deployment via GitHub Pages.
